Comments from Cooperative Extension Service County Agents

“We received 2 to 4 inches of rain late last week across the county. Rice was progressing with many acres at or just past mid-season, and peanuts were blooming. A few more soybeans will be planted next week if the ground dries enough to get across.”

- Mike Andrews, Randolph County

“Some rain received last week helped soybeans, pastures, and hay fields perk up this week. Soybean planting continued late last week. There was minor flooding as the Arkansas River again got above flood stage.”

- Kevin Lawson, Faulkner County

“Fast moving, yet widespread, thunder showers have maintained soil moisture for the area. Producers were making hay and catching up on last year's losses. There have been no reports of armyworms so far. Reports usually start around the 4th of July. Vegetable production was still slow, but was picking up pace.”

- Glenda Sutherlin, Union County

“Weekend rainfall slowed final soybean plantings. Corn is from sickle to early milk stage, and early rice is at mid-season. Hay cutting was delayed due to rainfall.”

- Brent Griffin, Prairie County
